PROFESSIONAL SUMMARY

Motivated Computer Science student at FH Dortmund actively seeking a Werkstudent position (15–20 hrs/week) in Software Engineering, IT, or AI. Strong foundation in Python programming, AI workflow automation, and full-stack web development. Proven ability to build end-to-end applications, from data-processing GUIs to automated scraping bots and high-throughput LLM pipelines. Fully authorized to work in Germany and available full-time during semester breaks.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, Java, C, SQL, PHP, HTML/CSS
- **Frameworks & Libraries:** React, FastAPI, Node.js, PyQt5, Qt Designer, BeautifulSoup
- **Cloud & Technologies:** Docker, Linux, vLLM, Git, AWS, AI Agent Pipelines, RAG Systems, LangChain, LLMs
- **Spoken Languages:** Arabic (Native), French (Fluent), English (Fluent), German (C1)

EXPERIENCE

AI Automation Engineer **Germany**

- Architected a scalable automated parking violation detection pipeline using n8n and OAuth2/REST APIs, deterministically categorizing sessions to significantly reduce manual review efforts.
- Managed local LLM deployments (including Qwen3.5-122B Vision) on an NVIDIA DGX Spark server, utilizing Docker and vLLM for optimized, high-throughput inference.
- Engineered a deterministic decision engine using custom JavaScript to evaluate Vision AI observations against historical customer profiling and system ground-truth rules.
- Designed strict Vision AI prompts and custom parsers to validate JSON schema outputs, ensuring the AI strictly acts as an objective, pixel-reliant control assistant.

Brand Promoter at Signal Iduna Park (BvB) **Germany**

- Acted as a brand ambassador at Signal Iduna Park, engaging with attendees in a high-energy environment.

Programming (Part-Time) Teacher **Tunisia**

- Instructed young students in foundational programming concepts using HTML, CSS, and introductory Python, guiding them through the hands-on development of practical mini-projects.

HACKATHONS & COMPETITIONS

- **DO-DATA-HACKATHON** – *Centrum für Entrepreneurship & Transfer, TU Dortmund* Oct 2026
  - Selected to participate in a data-driven hackathon focused on developing innovative tech solutions.
- **COME. BUILD. WITH AI Hackathon** – *Nvidia X GOMYCODE* Sept 2026
  - Participated solo to architect and deploy "InterConnect," an AI-powered campus guide application for international students using FastAPI, RAG, and Gemini.

TECHNICAL PROJECTS

- **TrackX – Student Life Tracker (In Development):** Architecting a comprehensive web and mobile application for university students utilizing Agentic AI and RAG to seamlessly automate personal scheduling and academic tracking.
- **Automated Web Scraper & Notification Bot (Python):** Engineered an automation script to continuously scrape marketplace platforms for specific item listings, integrated with a real-time WhatsApp notification delivery system.
- **Vehicle Registry GUI (Python, PyQt5):** Developed a desktop application using Qt Designer featuring backend text parsing, binary serialization, and a dynamic table interface.

CERTIFICATIONS

- **Nvidia X GoMyCode Build With AI Hackathon** – *Nvidia* 2026
- **Start Writing Prompts Like a Pro** – *Google* 2026
- **Stay Ahead of the AI Curve** – *Google* 2026
- **1 Million Prompters Certification** 2026
- **Anthropic AI Fluency Certificate** – *Anthropic* 2026
- **Introduction to Claude Cowork** – *Anthropic* 2026
- **Claude 101** – *Anthropic* 2026
- **Prompt Engineering** 2025
- **telc Deutsch C1** – *ÖSD* 2024
- **Python Programming** – GoMyCode 2021
